Submitted to His Highness

18

These papers relate to the question of the grant of a scholarship to Mir Mahomed Ali Khan, son of Mr Mir Nizamuddin Ali Khan, retired Assistant Commissioner, for studying Electrical Engineering in America

2. In accordance with His Highness' orders conveyed in Mr Campbell's D O No 336 dated 27th April 1911, Mir Mahomed Ali Khan was directed to undergo a probationary course for one year in the local works, prior to deciding the question of sending him to America with a scholarship

3. The probationary period is now over, and the Secretary, D P W , has sent up the reports of the Chief Operator and the Chief Electrical Engineer in regard to the candidate's fitness for undergoing a course of study in America The Chief Operator has stated that on the whole an opportunity to increase his knowledge and experience will make the candidate a useful man in Engineering work The Chief Electrical Engineer recommends that he may be given favourable consideration by Government The Chief Electrical Engineer has also proposed a different line of policy than that now followed in regard to these

12

these scholarships and suggests a five years' training but the Secretary, D P W refrains from offering any opinion on the proposal in the absence of instructions from Government

Paper under disposal para - 2

4. The Secretary, D P W , has also pointed out that the question of the continuance of the present scholarship of Rs 35/- till the question of his deputation is settled, requires the sanction of Government

-do- para 3

5. At the same time, both Mr Mir Nizamuddin Ali Khan and Mir Mahomed Ali Khan have asked for early orders for the grant of the scholarship to study Electrical Engineering in America

6) The question now for consideration is whether the applicant Mir Mahomed Ali Khan is to be sent to America, and if so, for what period and on what terms

7. It may be noted that there are no funds for the grant of any Damodar Dass' Scholarship this year and moreover, the case of the applicant does not fall under those rules, which prescribe higher educational qualifications than the Matric which alone he can boast of There is apparently no reason why the candidate should not attend one of the Indian technical schools and qualify himself for service

Letter No 251 dated 29th April 1912, from Mr F W Willis, Chief Operator, C P S , Sivasamudram, to the Chief Electrical Engineer to the Government of Mysore

-----o-----

In accordance with your No 2045 dated 1st June 1911, I beg to submit a report on the progress of Probationer Mir -- Mahamad Ali Khan

During the time that Mr Ali Khan has been with me, he has been given an opportunity of showing his capabilities in our Workshops, in operating, Hydraulic and Electric, and in construction work. Although lacking in experience which could only be expected in a man of his age, he has shown himself - capable and keenly interested in all the work entrusted to him Personally his behaviour has been exemplary His adaptability ce has been shown from the fact that he has been accommodated in poor and uncomfortable quarters in the cooly lines without complaining His health in Sivasamudram has been as good as the average On the whole, I believe that an opportunity to increase his knowledge and experience will make him a useful man in Engineering work

---

STUDENTS' COURSE

In reply to your No 202/C P S dated the 14th May 1912, requesting my opinion as to the fitness of Mir Mahamid Ali Khan to undergo a course of study in Electrical Engineering in America, I have the honour to state that, from the slight personal - knowledge which I have of the young man's work and the high - opinion which the late Chief Operator Mr Willis had and the - present Ag Chief Operator has on his abilities and keenness to make a success of electrical work, I recommend that he be given favourable consideration by Government If I may be permitted, however, I should recommend a somewhat different educational - policy than has in the past been in vogue, with an idea of perfecting our men in the practical workings of electrical power schemes such as the C P S , in preference to a highly technical course at the expense of the practical training

II It is an old saying in America that for one to be a thorough master he must first be a thorough subordinate, and my suggestion as to future policy in connection with students to be sent abroad is as follows -

(1) A two years' course in Electrical Engineering at Union College, Schenectady, N Y , all spare time and - vacation periods to be spent in the General Electric Company's works, Schenectady, in practical - training, following as nearly as possible the practical instruction and experience in keeping with - the College technical course

(2) After completion of the two years at Union College, a

7

course in the General Electric Company's works is recommended as follows -

(a) 6 months in actual work in the Machine Department
(b) 6 " in Dynamo and Transformer Winding Departments
(c) 3 " in Apparatus Assembling Department
(d) 3 " in Switchboard Department
(e) 6 " in Generator and Transformer Testing Departments
(f) 12 " as an actual construction man to be sent out with the regular construction staff of the General Electric Company for the installation of power apparatus in America, and on outside "trouble" work

III The above course which will require a period of 5 years to cover, should, with the expected application of the student to the practical as well as the theoretical work, turn him out a man, whose services would be of considerable value to Govt in an executive position in the Electrical Department

IV I do not mean to infer that a man, after having successfully passed a course such as outlined above, should necessarily limit himself to practical details, only, on return to India ce I am convinced, however, that to obtain highest efficiency in a department like the C P S , its men must be trained not only theoretically but with a great deal of care, practically, to enable them to efficiently cope with emergencies which, at any moment, are liable to occur

V I feel certain that the General Electric Company would co-operate along the above lines and they would, no doubt, after the first year or year and a half, compensate students with - wages which should make them practically self-supporting

To

J Ananda Rao Esqr
B A, C I E
Dewan of Mysore
Bangalore

Respected Sir,

Most humbly I beg to say that My probationary period of one year at Shivasamudra in Electrical Department has expired on the 13th of June 1912 I am however Continuing as a probationer at Shivasamudram, awaiting the orders of the Government, to send me to America for further studies

As I have come to know that the Colleges in the united States of America, open during the first week of September I beg you to kindly take up My humble Case for favourable Consideration, So that I may reach the place and join the institution, in due time

I also beg to bring to your kind notice that the Scholarship Sanctioned to me has not been Continued after the 1st June 1911 as no orders have been received by the Government in the Matter

I pray that early orders may be

12

kindly passed allowing me to draw the scholarship for the short time that I have to remain at Sivasamudram, from the 1st June 1912

I beg to Remain
Sir
Your Most obedient and
humble Servant

Mir Mahmud Ali Khan
